Jln Tun Razak, Bandar Alor Setar

Alor Setar, Kedah ,Malaysia

## ADDITIONAL STRENGTHS

- Fast learner
- Strong teamwork and leadership
- Problem-solving and analytical thinking
- Fluent English communication

## PROFILE

I am a Computer Science student at Albukhary International University with a strong interest in software development, digital systems, and structured project work. I handle requirement notes, workflow planning, testing, and simple feature reviews with care. I enjoy working with data, documentation, and system logic. I stay organized, finish tasks on time, and communicate clearly. I want an internship that helps me grow in software engineering, digital product work, or IT operations.

## EDUCATION

Bachelor of Science in Information Technology

Albukhary International University (AIU), Malaysia

2023 – Present

## TECHNICAL SKILLS

Programming: C, Java, JavaScript, HTML, Dart (Flutter)

Tools: Git, Linux, Nmap, Wireshark, Burp Suite, Kali Linux, Parrot OS

Cloud: Basic cloud deployment, server testing, version control

Database: SQL, schema planning, data checks, performance notes

Testing and Analysis: Feature testing, workflow review, error reporting, data validation

Other: Documentation, simple UI checks, team communication, system flow planning

## PROJECTS

IPRT System Development – Key Developer

- Built and maintained modules for information processing.
- Assisted with deployment and testing on cloud.

Key Logger Prevention Mechanism – Lead Author

- Designed framework for detecting and blocking keyloggers.
- Presented findings at an academic session.

Online Retail Store Database – Database Designer

- Structured schema to handle orders and inventory.
- Improved data queries for faster response.

Cyber Ethics Report – Team Lead

- Produced a detailed report on digital responsibility and legal aspects.
- Managed a four-person team and presented findings.

Virtual Accessibility Software – Co Developer

- Built simple navigation flows for visually impaired users.
- Added audio prompts to guide users through each screen.
- Tested core functions and improved user steps.

Multi Tenant SaaS Platform – Product and System Support

- Reviewed user requirements and planned workflow structures.

## CERTIFICATIONS

- Coursera: Foundations of Cybersecurity
- Web Security and Bug Bounty: Learn PenTest
- Cisco Cybersecurity Essentials
- Cloud and network security short courses
- PCEP Certified Entry-Level Python

## REFERENCES 2

Prof Dr. Zurinahni Zainol

- Documented system logic for each tenant model.
- Tested features and reported errors with clear steps.
- Tracked changes and aligned system behavior with user expectations.
